Sunbrella

Sunbrella, a fabric made of acrylic fibres with pigmentation added prior to extrusion which offers the rich look and feel of cotton, but does not fade or degrade.

Sunbrella fabric is 100% solution-dyed acrylic that is specifically designed for outdoor use and is UV, mould, mildew, water and stain resistant.

Even in the brightest sun, Sunbrella offers years of carefree service with a warranty that is unheard of in the marketplace.

With its legendary combination of durability, water repellency, breathability and beautiful style, Sunbrella fabric is the perfect fabric for shading on land or sea.

The Skin Cancer Foundation recommends Sunbrella fabrics in shading products as an aid in the prevention of sun-induced damage to the skin as a part of a complete sun protection regimen, including regular use of sunscreen.

Applications

Architectural Roof System
Folding Arm
Vertical
Fixed
Pivot Arm

Technical Specifications

Base Cloth
Pigmented acrylic fibre

Coating
Thermosetting resin, powerful fungicides and fluropolymer fabric protector which imparts water and soil repellency

Width
117cm or 152cm

Weight
314gsm

Water Resistance
Static Waterhead - 2.5kPa, Shower rating - 100%

Shrinkage
0% warp and weft

Warranty
10 year limited

Made in
USA

Care and cleaning
One of the best ways to keep Sunbrella® fabrics looking good is to brush off dirt before it becomes embedded in the fabrics and wipe up spills or clean soon after a stain occurs. The quicker you clean spills and stains, the easier they can be to remove. When it's time for a thorough cleaning, Sunbrella fabrics can be cleaned while still on an awning frame or, size permitting, they

can be removed to aid in the cleaning of stubborn stains or for professional cleaning. For our complete cleaning guide, stain chart and available cleaning products such as 303 then please contact us.
