

BARRINGTON FEATURES

BIO-ULTRASHIELD

The Bio-UltraShield protective fabric coating system incorporates a double antimicrobial treatment process. This is achieved by sanitising the woven loomstate canvas with a specially designed protective treatment to provide resistance against bacterial growth, mould and mildew. The outer coating is then applied to both sides of the pre-treated sanitised canvas. This decorative and protective coating includes the highest quality colour pigments and UV stabilisers as well as further protective antimicrobial treatments. The Bio-UltraShield fabric protective coating system ensures that your Barrington canvas awning will maintain colour vibrancy and provide protection against the elements for the life of the awning.

DURABLE AND EASY TO MAINTAIN

Barrington fabrics are as durable as they are stylish and are designed to handle high traffic applications with ease. These fabrics should be hosed regularly to remove dust, bird droppings and other solid particles and should not be rolled up or stowed away while wet. Comprehensive care details are available on the Ricky Richards website or by request from Ricky Richards (Sales) P/L.

10 YEAR WARRANTY

Barrington fabrics are supported by a 10 year warranty. This warranty covers changes in physical properties and is valid for 10 years from the date of purchase. Further details about this warranty are available on the Ricky Richards website or by request from Ricky Richards (Sales) P/L.

MELANOMA INSTITUTE AUSTRALIA

When you choose a Barrington fabric, a percentage of sales are donated to the Melanoma Institute Australia to fund vital research and support their goal of zero deaths from melanoma.
