

Dickson INFINITY

The refinement of a seamless fabric

The technical textile with its unique technology: the Dickson Resilient System®

Infinity revolutionises broad-span awnings. With its extra wide 3.2 metre span, Infinity awning allows you to create seamless sun protection for optimal aesthetic results. Its unique high-resistance weave ensures even weft and warp elongation, allowing for single piece construction to prevent thickening and reduce distortion.

Dickson INFINITY fabrics are woven from 100% solution-dyed SUNACRYL HIGH TENACITY acrylic fibre.

The colour is locked right into the very core of the the fibres during manufacture (in contrast to the traditional yarn-dying process whereby colours are applied to the finished yarn and remain on the surface). Dyed all the way through, this type of yarn ensures exceptionally long-lasting, ultra vivid colours.

Finished with a special treatment CLEANGARD®, the ultra modern process for protecting outdoor fabrics called NPP (Nanotechnology Protection Process), is based on an extremely dense assembly of nanomolecules which create a genuine water barrier and prevent dirt from building up. It ensures optimal beading and outstanding water resistance.

Applications

Architectural Roof System
Folding Arm
Vertical
Fixed
Pivot Arm

Technical Specifications

Composition

100% solution dyed Sunacryl acrylic - HIGH TENACITY

Finish

CLEANGARD®-special dirt-resistant and water resistant treatment

Width

320 cm

Weight

290gsm

Thickness

0.64mm

Schmerber(Water Column)

>350mm
